

Setting up Application Environment

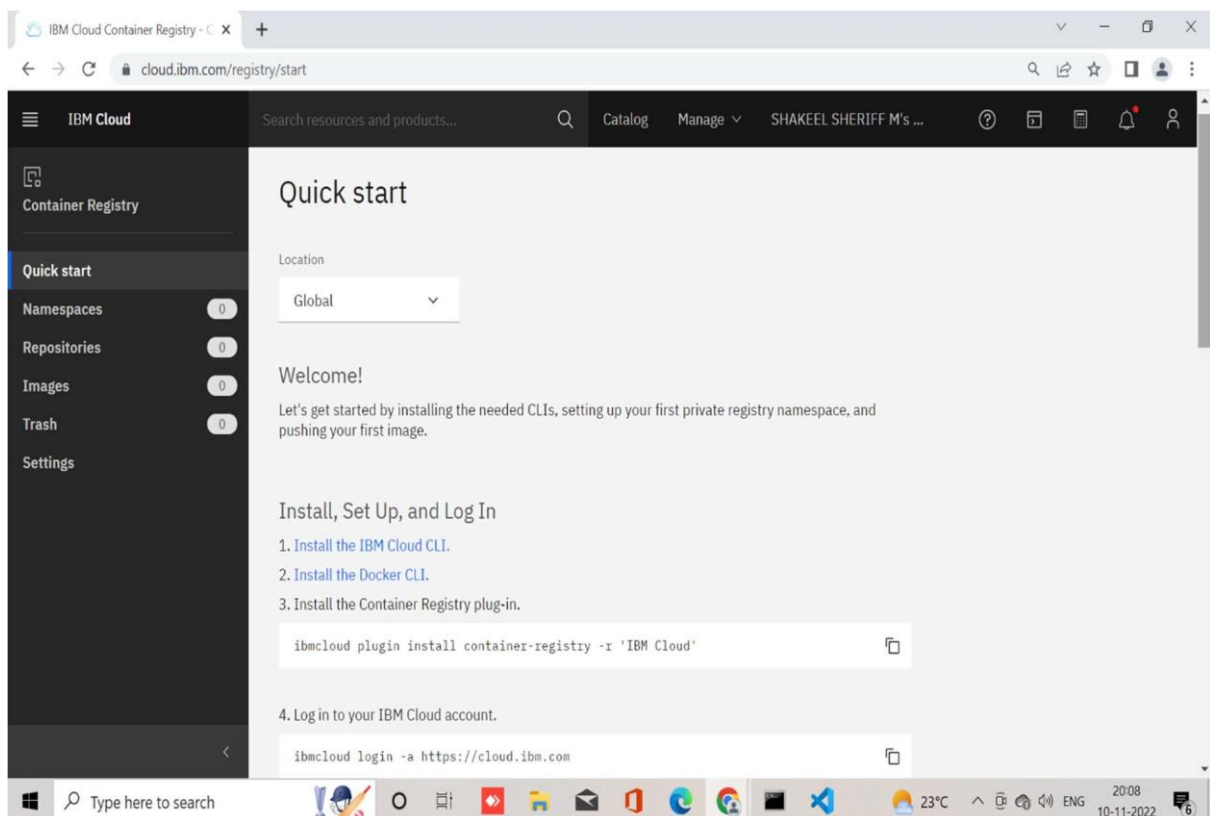

IBM Cloud CLI Installation

Date	06/11/2022
Team Id	PNT2022TMID15605
Project Name	Plasma Donor Application
Maximum Marks	4 Marks

Step 1: Login to cloud account

Step 2: click container registry

Step 3: Click quick start and install the IBM cloud CLI

The screenshot shows the IBM Cloud CLI documentation page. The left sidebar contains a navigation menu with sections: 'Get started' (including 'Getting started with the IBM Cloud CLI') and 'How to' (including 'Installing the stand-alone IBM Cloud CLI', 'Installing the tools and plug-ins manually', 'Installing and using private endpoints', 'Extending IBM Cloud CLI with plug-ins', and 'Working with multiple sessions with the IBM Cloud CLI'). The main content area is titled 'Installing the stand-alone IBM Cloud CLI' and includes a tip: 'Tip: If you want to install both the latest IBM Cloud CLI and other recommended plug-ins and tools for developing applications for IBM Cloud, see [Getting started with the IBM Cloud CLI](#) and [Installing the tools and plug-ins manually](#).' Below this is a 'Before you begin' section with instructions on using a 32-bit version or previous versions. The 'Installing with an installer' section begins with 'Use the following steps to install the latest stand-alone IBM Cloud CLI:'. The right sidebar lists 'On this page' with links: 'Before you begin', 'Installing with an installer', 'Installing from the shell', 'Installing to a custom directory', and 'Updating the IBM Cloud CLI'. A 'Feedback' button is also visible.

Step 4: Choose the correct version for the system

The screenshot shows the GitHub releases page for the repository 'IBM-Cloud / ibm-cloud-cli-release'. The page displays the 'Releases' tab with a search bar 'Find a release'. The latest release, 'v2.12.1', is highlighted with a 'Latest' badge. Below the release title, there is a section for 'Installers' listing various operating systems and architectures: 'Mac OS X 64 bit', 'Mac OS X M1/ARM (as-is)', 'Windows 64 bit', 'Windows 32 bit', 'Linux 64 bit', 'Linux 64 bit ARM (as-is)', and 'Linux 32 bit'. The left sidebar shows the release was made '10 days ago' by user 'steveclay' and includes a 'Compare' button.

Step 5: click next and setup finish
